PROFESSIONAL SUMMARY

Computer Programming student at Algonquin College with experience using Java, SQL Server, and Linux through academic projects and coursework. Experience working with data, troubleshooting technical issues, and creating system and database documentation. Strong attention to detail, problem-solving skills, and interested in gaining hands-on experience supporting applications and databases in a co-op role.

PROGRAM-RELATED SKILLS

Programming:
Used Java to build applications using object-oriented programming concepts such as constructors, validation, and testing. Created basic web pages using HTML, CSS, and JavaScript.

Database Management:
Designed relational databases using Microsoft SQL Server, MySQL, and Oracle SQL Developer. Created tables, relationships, queries, stored procedures, functions, and indexes.

Operating Systems:
Used Linux in a virtual machine environment to manage files, **permissions,** and system configuration.

Software and Development Tools:
Experience using Eclipse, Visual Studio Code, SQL Server Management Studio, MySQL Workbench, Oracle SQL Developer, VMware Workstation, Microsoft Office, Power BI, and Tableau.

EDUCATION

Computer Programming Diploma **Sept 2025 - Sept 2027**
Algonquin College, Ottawa, ON
Coursework: Object-Oriented Programming (Java), Database (SQL), Operating System (Linux), Web Programming (HTML, CSS, JavaScript), Technical Writing

Bachelor of Science Microbiology,
University of Nigeria, Nsukka
Assessed as equivalent to a bachelor's degree in Canada by WES

ACADEMIC PROJECTS

HR and Payroll Database Project **2026**
Algonquin College

- Designed a relational database using Microsoft SQL Server
- Created tables, primary keys, foreign keys, and relationships
- Wrote SQL queries and stored procedures to insert and retrieve data

- Tested the database to ensure accurate data storage and retrieval
- Migrated the SQL Server database to a cloud environment using Microsoft Azure
- Created documentation explaining the database structure and migration process

Driver's License Management System (Java) **2026**
Algonquin College, Ottawa, ON

- Developed a Java application using object-oriented programming principles
- Tested application functionality using Junit
- Generated UML diagrams and Javadoc documentation
- Debugged and tested the application using Eclipse

WORK EXPERIENCE

Data Analyst, Pseudonet Logistics, Nigeria **2020 – 2024**

- Collected, cleaned, and analyzed logistics and operational data to support business decision-making.
- Created reports and dashboards to track shipment performance, delivery timelines, and operational efficiency.
- Identified trends and data inconsistencies, helping improve workflow accuracy and reduce delays.
- Collaborated with team members to ensure accurate data entry, reporting, and documentation.

ATM Custodian, Union Bank **2017 -2019**

- Maintained and monitored ATM systems to ensure continuous operation and reliability
- Investigated and reported technical faults and operational issues
- Followed strict security and compliance procedures when handling sensitive financial systems
- Performed routine inspections and troubleshooting to minimize system downtime
- Collaborated with other technical support teams to resolve hardware and system-related issues promptly

OTHER WORK EXPERIENCE

Server, Hard Rock Hotel & Casino, Ottawa **June 2025 – Present**

- Communicate effectively with guests to take orders, answer questions, and ensure a positive dining experience.
- Coordinate with the kitchen and team members to deliver accurate and timely service.
- Demonstrate strong customer service, multitasking, teamwork, and problem-solving skills in a multicultural workplace.
